

Difficult diseases have met their match.

Volunteer Newsletter

Fall 2025

Have you ever wondered how to get in contact with a clinical trial?

ResearchMatch's "Send My Information" tool allows you to ask ResearchMatch to share your email and/or phone number with a study team. Simply visit [Trials Today](#) to search the thousands of clinical trials that are recruiting participants across the U.S., and follow the steps below:

1. Using [Trials Today](#), find a clinical trial that is of interest to you.
2. Click on the trial to learn more.
3. Click the "Send my information" button on the top right, and follow the instructions outlined on that page. You'll be asked to sign into your ResearchMatch account and select a study location if there are multiple sites.
4. Next, select your contact information (email and/or phone number) and confirm that you would like your information shared with the study team.
5. If the study team is looking for study participants, ResearchMatch will share your information with them. You will then receive an email if your information is shared.
6. Wait to hear back from the study team to learn more about participating.

Watch [this video](#) to learn more about how to find a research study through ResearchMatch.

Meet some of our Researchers

Interested in learning more about the researchers using ResearchMatch to find volunteers for their studies? Meet Dr. Charles Taylor, PhD from the University of California-San Diego! Click the image below to hear about his research in the field of anxiety and depression.

New recorded webinar with the Melanoma Research Alliance

ResearchMatch is proud to collaborate with the [Melanoma Research Alliance \(MRA\)](#) to share information about melanoma skin cancer research, clinical trials, and resources to support patients and their families.

ResearchMatch is now featuring a new collaborative webinar with MRA! This webinar

features presentations from experts and patient advocates, covering topics such as the current state of melanoma research, personal experiences with the disease, and recent advancements in treatment. The discussion highlights the importance of early detection, ongoing research efforts, and the critical work of patient participation in clinical trials and registries.
